FIT5137 Assignment 3 Report

Task 1 Data Restoration

The supplied GTFS and Australian Statistical Geography Standard datasets were restored into the ptv schema in PostgreSQL/PostGIS. Figure 1 reports the row count for each restored table using the prescribed validation query. All 11 required tables are present, including the GTFS, Mesh Block, Local Government Area, and Suburb and Locality datasets.

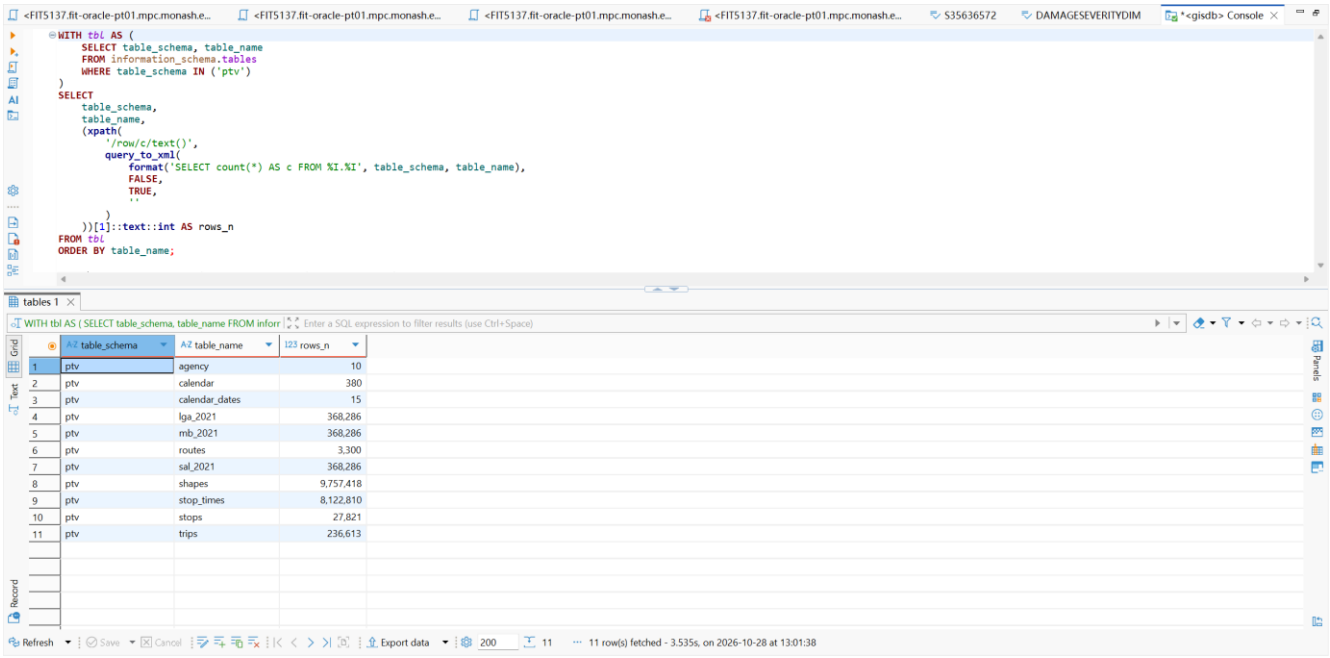

Figure 1. Row counts for the 11 tables restored in the ptv schema.
